

Show Me the Light

Mystery Jets

So here we are in the dark
Another dark feels like a water park
I start to come undone
When I'm living on the other side of the sun

Sometimes I feel that it's all too much to take
I look in the mirror but don't recognise my face
So show me the light
And tell me that things will turn out right
It cuts like a knife
When you say things will turn out right

Temptation my old friend
You come back to lead me off again
If you see me acting strange
You can call... but you know I'm not afraid

Sometimes I feel that it's all too much to take
But all that changes when I look upon your face
So show me the light
And tell me that things will turn out right
Remember the nights
How we would hold each other tight

We live for today
But we've know way of knowing
What tomorrow holds
Or where we are going
The weather man he says
Soon it will be snowing
The sky at night is dark
The stars they all start glowing

So show me the light
And tell me that things will turn out right
It cuts like a knife
When you say things will turn out right

So show me the light
And tell me that things will turn out right
Remember the nights
How we would hold each other tight

The weather man he says
Soon it will be snowing
