

Something In Your Bones

Nadine Coyle

I hope you understand that
You've got to be commanding
I've never made the thunder
With someone by my side
Oh, I could not have planned it
I didn't do romantic
I've never met another
Who got it all so right

You've got something in your bones
That makes your blood hot every night
You've got a fire in your soul
That makes my heart stop every time

I gotta hand it to ya 'cause
I can see right through ya
There's not a storm of thunder
Could get you out my sight
We've got our own addictions
You say it with conviction
A certain type of friction
Can't keep us warm at night

You've got something in your bones
That makes your blood hot every night
You've got a fire in your soul
It makes my heart stop every time

Give me everything
Everything, give me good
And I had no time to breathe
Time to breathe over you, baby
Give me everything
Everything, give me good
And I had no time to bring
Time to bring something to the table

There's a hurry in your heartbeat
A fire in your soul
And every time that you move
That feeling grows
Starting rumours in the backseat
And they'll never need to know
And suddenly I've never been in love before

You've got something in your bones
That makes your blood hot every night
You've got a fire in your soul
It makes my heart stop every time

Give me everything
Everything, give me good
And I had no time to breathe
Time to breathe over you, baby
Give me everything
Everything, give me good
And I had no time to bring

Time to bring something to the table
