

The Light

Nana Darkman

Do You See The Light
How It Shines So Bright
Do You See The Light
Open Up Your Eyes
Do You See The Light
Stand Up And Change Your Life
If You Can Try Again
This Light Will Shine For You

it's ya boy darkman once again with a hit
i am still god's son i don't need any clip
i take action when i see benefit
now it's 2009 i was dreamin' of it
if life is a toothpaste squeeze it a bit
if my name is a leaf then you are breathin' the mint
there's more than you know believin' is which
way you'll go only god knows
it's been a long time turn on the switch
and it's been a long ride so we've burned all the
slicks
finally we came far ditched all the pigs
you don't need a sports car you can ride on my d*ck
you can't see what i see you can ask a.k. Swift
i got the light in me i am lightinin' mc queen
the music in my soul is the spice in me
no matter friend or foe you can't frighten me

Do You See The Light
How It Shines So Bright
Do You See The Light
Open Up Your Eyes
Do You See The Light
Stand Up And Change Your Life
If You Can Try Again
This Light Will Shine For You

it's a family thing and i am the boss of the clique
i speak many tongues like a call center chick
your life is a run and it's all politics
you better have some fun 'til you walk with a stick
i hate violence i'm allergic to it
but if ya mess with a nigg' i'll serve you a kick
so be my friend and i'll post you a link
and if you ain't satisfied i owe you a drink
so tell everybody who gave you the tip
and now we both go together like patient and shrink
i believe in the good i've saved you a trip
spent time in the hood i don't need any tricks
do you understand after dark comes light amen amen

Do You See The Light
How It Shines So Bright
Do You See The Light
Open Up Your Eyes
Do You See The Light
Stand Up And Change Your Life
If You Can Try Again

This Light Will Shine For You

i
i am gonna reach
i am gonna reach
the sky
you know i am

i
i am gonna reach
i am gonna reach
the sky
you know i am

do you understand
after dark comes light amen
amen
