

## It's the Love (That Keeps It All Together)

Nancy Sinatra

Somehow we get through all the tears  
And the hurt that seems to build up through the years  
And through all the childish names, through lonely nights and games  
Why do we do it, there's no sense to it

It's the love that keeps it all together  
It's the love that keeps us going forever  
It's the love that keeps it all together  
If we can keep our hearts about us  
Trying hard to never doubt the love  
We keep it all together

Somehow we get through all the days  
Of each wanting to go our separate ways  
And when all is said and done, you know you're the only one  
Through every season and you know the reason

It's the love that keeps it all together  
It's the love that keeps us going forever  
It's the love that keeps it all together  
If we can keep our hearts about us  
Trying hard to never doubt the love  
We keep it all together

It's the love that keeps it all together  
It's the love that keeps us going forever  
It's the love that keeps it all together

It's the love that keeps it all together  
It's the love that keeps us going forever  
It's the love that keeps it all together

It's the love that keeps it all together  
It's the love that keeps us going forever  
It's the love
