

# Orders of Magnitude

## Napalm Death

Efficiency action  
for unprecedented tragedy  
Befallen calamities  
in the light of what's happening

By orders of magnitude  
polluting our altitude

Thus we drift towards  
unprecedented catastrophes  
The coalition of the willing  
- diabolical energy

By orders of magnitude  
- contaminates latitude

Orders of approximation  
for geometric means  
Generating smoke screens  
for our transmuted genes

Pressures mount  
on seismic encounters  
Omitting man-made elements  
Immediate danger to all life forms  
Offering a chorus of soothing denial

Power of the essence,  
a strange psychology  
An era of scarce resources  
and casualty strategies

The calamity has befallen  
despite heroic efforts  
It's growing increasingly grave  
Instability continues to reign

Eco-shock - fills our seas,  
bone disease, filling our skies,  
followed with lies

Singular cancers ,  
Absolute disasters  
Ironic tragedy  
Dark aspects of chemistry

Contaminate the cradle of civilisation  
 $e = mc^2$

Divisions of atomic casualties  
And bent fuel industries  
As horrific situations unfold,  
it's a nuclear future ten fold
