

Beautiful Dream

Nashville Cast

Off to sleep I'm going to meet you in the night
When you're around I'm all filled up and bright
I don't know much about you
But I know you're in my heart
I was hoping I could find you in the dark

I wanna wake up holding you darling
I wanna wake up feeling you, feeling you breathe
I know there's nothing about you that's real but I keep on believing and seeing you, you and me in this beautiful dream
Seeing you, you and me in this beautiful dream

The way you hold your head up
The way your eyes they shine
I never wanna come down off this high
So I won't try and fight it, I need you more and more
Every time my heart collides with yours

I wanna wake up holding you darling
I wanna wake up feeling you, feeling you breathe
I know there's nothing about you that's real but I keep on believing and seeing you, you and me in this beautiful dream
Seeing you, you and me in this beautiful dream

I wanna wake up holding you darling
I wanna wake up feeling you, feeling you breathe
I know there's nothing about you that's real but I keep on believing and seeing you, you and me in this beautiful dream
Seeing you, you and me in this beautiful dream
You and me in this beautiful dream
