

Going Electric

Nashville Cast

Heard enough of your feedback, now I wanna talk
So just leave it to me to turn you on
Touching my hands, the sound of you
Making a stage out of our living room
You scream so loud they make us turn it down

You got me going electric now
You got me going electric now

You're the bottle of lighting, a rock in the road
Just one shot of you and I'm ready to go
Wherever you go you're gonna draw that crowd

You got me going electric now
You got me going electric now
You got me going electric now

Going electric
You got me going electric now
You got me going electric now
You got me going electric
Going electric now
You got me going electric now
you got me going electric now
you got me going electric now
