

I Will Fall

Nashville Cast

I'm afraid to go up into the second floor
If you wanted to work it out why'd you lock the door
I thought I was good at loving you
But our light went out when you wanted it to
I wish you the best, I'm headed west
it's all I know to do

I will fall, I will fall if you come around
Just when I think my heart break has settled down
I will fall, I will fall if you come around

When we said goodbye it was forever
And I spent the last year piecing my life together
Just when I think I've let you go
Your song's playing on the radio
And just like that it rushes back
every part of you

I will fall, I will fall if you come around
Just when I think my heart break has settled down
I will fall, I will fall if you come around

Oooh, oooh, oooh
Oooh, oooh, oooh

I will fall, I will fall if you come around
Just when I think my heart break has settled down

I will fall, I will fall if you come around
Just when I think my heart break has settled down
I will fall, I will fall if you come around
