

# Stand Up

## Nashville Cast

Big city, small towners  
Coke canners, whiskey pounders  
The old and young country  
Stand up and move something  
Tattooed and rebel kinders  
The simple kind of lifers  
Smoke if you've got em lighters  
The talkers and the fighters  
The in and out crowds  
Living this life loud  
The ups and down and outs  
The time is right now

To stand up like nobody's watching  
Stand up, let em keep talking  
Shake the world up loud and clear  
Let em all know you stand up for love  
And lie for everything right  
Whatever you believe in  
Wave your flag high  
Put your hands up  
(Put your hands up)  
Come on and stand up  
Stand up

We're all in this together  
So let's all stick together  
Let's try to make it better  
'Cause we're not here forever  
Yeah, we all got a voice  
And we all got a choice  
Let's make the right one  
And make some real noise

Stand up like nobody's watching  
Stand up, let em keep talking  
Shake the world up loud and clear  
Let em all know you stand up for love  
And lie for everything right  
Whatever you believe in  
Wave your flag high  
Put your hands up  
(Put your hands up)  
Come on and stand up  
Stand up

We all break, we all bend  
We all fall, we all sin  
We're all perfect in our own little way, amen  
So stand up  
Come on and stand up

Stand up like nobody's watching  
Stand up, let em keep talking  
Shake the world up loud and clear  
Let em all know we're here  
Stand up for love

And lie for everything right  
Whatever you believe in  
Wave your flag high  
Put your hands up  
(Put your hands up)  
Come on and stand up  
Stand up

If you are who you are  
And you love who you love  
If you do what you do  
Then you better stand up  
Come on and stand up  
Come on and stand up  
Stand up

Come on and stand up  
Come on and stand up  
Stand up

We're all in this together  
So let's all stick together
