Somebody light a candle (yeah)
'Cause I like the light low
The vibe, like to keep it like Michael (hee, hee)
Moonwalkin' on the light toe, smooth and amazing
Girl, your body so smooth and amazing (yeah)
Wanna take you on a cruise or vacation
A little island where the rules for the breakin'
Two shots for me, two for you, baby, take 'em, yeah
And let's pretend, that this dark room is out of space

Just two stars in the universe
You ain't never hit the gas, baby, you first
Take it easy
It's gonna make magic in and out of space
So easy
Tell me where you wanna go
Where you wanna be, baby, I'm up
If you're down
Let's go, baby, right now, yeah
So come on take another shot with me
Baby, I'm up
If you're down
Get turnt, baby, right now
So come on take another shot with me, oh yeah (oh, yeah)
Oh yeah (oh, yeah)
Oh yeah, yeah

Let's have a conversation, little conversation (yeah)
But we don't gotta speak, no, we don't gotta speak, no
We can talk with our bodies
At the line, you in shock at your body
I'ma do things you never thought to your body
Keep it low and don't talk to nobody
You can stick around for the afterparty, yeah
And I hope you stick around, baby (hope you stick around, baby)

'Cause we're just two stars in the universe
You ain't never hit the gas, baby, you first
Take it easy
It's gonna make magic in and out of space
So easy, hey
