

# My Night Is Starless

Neaera

My night is starless, but I forge my faith.  
My night, my night is starless.  
My light is darkness, but I pave my ways.  
My night, my night is starless.

Storm warning, corruption of the soul.  
My center lies, lies outside the circle.

Stars of guidance unknown.  
Clarity uncrowned.

My night is starless, but I forge my faith.  
My night, my night is starless.  
My light is darkness, but I pave my ways.  
My night, my night is starless.

Forewarning, seduction of the soul.  
My center lies, lies outside the circle.  
Failure lurks as you make a stand.  
Certainty uncrowned.

Send forth your burden,  
you don't need your past, destination unknown.

Abort your servitude, exhale your death.  
Defy all certainty, inhale your self.

Your night was starless, but you forged your faith.  
Your night, your night was starless.  
Your light was darkness, but you paved your ways.  
Your night, your night was starless.
