

## Choices

Nero

For the first time in history  
Our planet is threatened by humans and our behavior  
To such an extent that the climate  
The habitat, and evolution itself may change forever

We're faced with choices  
Choices that will affect all of our lives  
The lives of our offspring and those to come.

We're faced with choices  
Choices that will affect all of our lives  
The lives of our offspring and those to come.

For the first time in history  
Our planet is threatened by humans and our behavior  
To such an extent that the climate  
The habitat, and evolution itself may change forever

We're faced with choices  
Choices that will affect all of our lives  
The lives of our offspring and those to come.
