

You say we're both little people and you like it that way  
But in time I'm gonna put this body to shame (and grow old)  
Where a suit like my old man  
Pack up all my things and get my ass out of town

We've got it good  
Whether you like this town or not  
I know it's small but with a big head  
it's bound to get hot  
In the summer  
But the summer is a bummer  
If you can't leave  
This pathetic excuse for a town

That holds all your memories  
A lifetime of crushes and your broken dreams  
To be anywhere but here  
But baby anywhere is away from me

If you got it all figured out  
Then what is there to shout about  
This mid-west town is gonna miss you  
Just go ahead and work it out  
But first come on and let it out  
Scream it shout tell everybody how your gonna leave

In about one year you'll have it all figured out  
These big city dream are what you're about  
Walking like strangers among these states  
Only time will tell how long I can wait

We've got it good  
Whether you like this town or not  
I know it's small but with a big head  
it's bound to get hot  
In the summer  
But the summer is a bummer  
If you can't leave  
This pathetic excuse for a town

That holds all your memories  
A lifetime of crushes and your broken dreams  
To be anywhere but here  
But baby anywhere is away from me

If you got it all figured out  
Then what is there to shout about  
This mid-west town is gonna miss you  
Just go ahead and work it out  
But first come on and let it out  
Scream it shout tell everybody how your gonna leave

Me again oh so casually  
Did you take the hit for me or the home team

If you got it all figured out  
Then what is there to shout about

This mid-west town is gonna miss you
