

## Falling Up

Never Shout Never

Don't turn on the radio  
Sing me something original  
Sing it like the old boy  
Twelve buck blues he's paid to stews

Don't listen to the media  
Lotting mass hysteria  
Listen to the wind blow  
As you roll your windows down

You're headed out of town  
You've heard enough for the city sound  
Your hopes are down but your head is down  
Don't you dare forget what you left it all behind

You're free, now  
Free from all the lies

Let go, of everything that keeps you low  
And baby let's get high, of li-li-li-li-li-li-life

Just say the word, and I will meet you half way  
"I I really missed you" that's all you gotta say  
And babe I'm on my way  
Just say the word I'm there  
Watch out here I come

I don't know what I've been told  
I'm falling in love and it's out of control

Look at he-er, I'm packing her bags  
Like she's in lo-ove  
Oh, look at me-e  
I'm pacing in circles waiting for a phone call

Up and away, up and awa-way  
Up up and away, up and away yeah

I don't know what I've been told  
I'm falling in love and it's out of control

Up and away, up and away yeah
