

World Through Your Eyes

Nicky Romero

Hey there shooting star
Can you give a little spark
Supernova

You never see the dark
What's it like to be this far
And always in motion

So come and take me up so high
Got to see it from the sky
Cause I

I wanna see the world through your eyes
I wanna see the world through your eyes

I wanna see the world through your eyes
I wanna see the world through your eyes

Hey there shooting star
Can you give a little spark
Supernova

You never see the dark
What's it like to be this far
And always in motion

So come and take me up so high
Got to see it from the sky
Cause I

I wanna see the world through your eyes
I wanna see the world through your eyes

I wanna see the world through your eyes
I wanna see the world through your eyes
