

Starlight Starbright

Nicolette Larson

Baby i am here
Baby i am here

Never thought that in a million years
Never thought that you would come to me
You're the answers to a million prayers.
You're the apple of my eye.

I can hear you breathing next to me.
Just how lucky can one person be?
I am looking at a mystery
Everything i dream, more than i can wish for.

Starlight starbright, all day all night
I will be right next to you.
Here forever, i will never leave, i will never leave.

Baby you're my little ray of light

I could find you in the darkest nights
If you cry then i will hold you tight
Never letting go, i would do that for you.

Starlight starbright, all day all night
I will be right next to you.
Here forever, i will never leave, i will never leave.

Baby i am here
Baby i am here

Starlight starbright, all day all night
I will be right next to you.
Here forever, i will never leave, i will never leave.
