

# Astropolis

## Nightfall

Erase the memories of loss /  
From time the capsule set to toss  
The vibrant journey in whirling space /  
The masterplan to save the race

Rise, arise

Landing on, our new sanctuary, our home

Above the skies / Where light hides  
Behing cold spheres / A colony's dreams

An independant soul / Away from its mal past howl  
A new beginning, new explore /  
A promise new offspring implore

Astropolis
