```
G5 G D E B C
G D E C
   G
                 D
                                    E
1. We wrote this song, it's not too short it's not too long
                                            E C-C
   it's got backup vocals in just the right places
                                E
   it's got a few oohs and ahhs and it takes a little pause
                          В
                            С
   just before I sing the second chorus
                                E C B-A
   G
                    D
R: Please play this song on the radio
2. Almost every line is sung in time and almost every verse end
s in a rhyme
   only problem we had was writing enough words
   ooh ahh...
   but that's OK cause the chorus is comin up again now
R: Please... (2x)
(solo)
(I don't know it, you can improvise)
R: Please...
3. Right about this time some shithead will be drawin a fat fuc
kin line
   over the title on the backsleeve, what an asshole!
   so mr. DJ i hope you already made your segway
   or the FCC is gonna take a shit right on your head
```

R: Can't play this song on the radio...
