## **Dragons**

## **Nomans Land**

My dragons appear from morning mist As shadows the warriors glide up the walls Forbidding fortress in a quiet dream Meet this unlucky surprise

My will has already won
Thirty of us stronger than hundred of them
Rocks more dangerous in my land
Children more skillful than guards here

If you still don't believe the way Try my magic mushrooms This will clear your mind of doubt Show you all from another world

If you think you know all around Try my magic mushrooms
It will change the meanings of things
It will change your mind soon

Sudden blow as the iron fist We realize the will of gods No one can have rights to rule Everyone can fight for his truth

Never be sorry for those who failed Their truth is weak and they are prey No one can have right to lead But other may follow the sage

Asgard see my, I am on the way Valhalla is here right where you stay
