

Razors

Nonpoint

Your words aren't as sharp as you believe
You're not leaving any scars on me
You think you're gettin' inside my head? You gotta wait
'Cause you're not even gettin' past the gate

It's my words that will make this right
My words that will tear and bite
Right straight to the bone just like... razors
Put it straight to the bone just like... razors
Put it straight to the bone just like... razors
Put it straight to the bone just like... razors
Put it straight to the bone

Don't even try to open your mouth
'Cause I know every word that's commin' out
and I don't need another excuse
of why I've got to take your abuse

You can't hurt what you can't see
Let me introduce you to the invisible me
Leaving scars behind just like... razors
Leaving scars behind just like... razors
Leaving scars behind just like... razors
Leaving scars behind just like... razors
Leaving scars behind

It's my words that will set things right (cut you like a razor)
It's my words that will tear and bite (cut you like a razor)
You can't hurt what you can't see
Let me introduce you to the invisible me
Leaving scars behind just like... razors
Put it straight to the bone just like... razors
Leaving scars behind just like... razors
Put it straight to the bone just like... razors
Leaving scars behind
