## **Your Betrayal**

## **Nostradameus**

You never cared for human rights
You always had a way to justify
Your crimes against humanity
But now the time has come fo ryou to see
That we have no intention ever to forgive...

Your betrayal No, we have no intention to forget Your betrayal

The wars you start around the world
The truth about them will soon be heard
You're leaving children there to die
You twist our minds with lies and tell us why
But we have no intention ever to forgive...

Your betrayal No, we have no intention to forget Your betrayal

So as your army marches on United states or nations, who won? When rules we had to keep us free Were not for you but just for them and me And we have no intention ever to forgive...

Your betrayal No, we have no intention to forget Your betrayal
