Who You Are

Number One Gun

And what is your name
You gotta believe in something
And haven't you heard that nothing
(Brings me down)

You start with the same
And how does it feel to know how
The feeling inside is gone now
(I will wait)

Backing up is gonna hurt yourself
But I will wait
Your destination is gonna kill yourself
But I'll have faith

This way your confident
Now that your facing it
You used to fear the pain you had
You'll take it by the hand instead
So take me now
You'll have your time to notice me
And everything is real

I have to decide
If leaving myself is worse than
The only thing left to know is time will tell

I'm kinda afraid
Your turning me into something
You're telling me now that I kept waking up

You're breaking up you're gonna hurt yourself
In time, you'll die
You're facing up you gotta save yourself
You know, its right

This way your confident
Now that your facing it
You used to fear the pain you had
You'll take it by the hand instead
So take me now
You'll have your time to notice me
And everything is real

Let's be the way we used to be
Its time to fall inlove
I'm not afraid to see the end

This way your confident
Now that your facing it
You used to fear the pain you had
You'll take it by the hand instead
So take me now
You'll have your time to notice me
And everything is real
