

## Got to Go

O-Town

Caught in the dead of the night with faces that I used to know  
They're speaking to me, trying to pull me in out of the cold  
No sign of light in the day and no hand around I can hold  
I long for the places my memory wants me to go  
Sing me a song for the road and save the last line for me  
'Cause I'm only half of the man that you want me to be

It looks like I've got to go, feels like the final scene  
And everything's falling down faster than I thought it would  
I hear your voice once more echo outside my door  
You know I'd change all this around now if only I could  
But I've got to go home

I used to play all the games, I'd see it out win or lose  
But no one's your friend when you walk in another man's shoes  
Running around out my head, keeping the pain inside  
You found me out and you showed me i don't need to hide

It looks like I've got to go, feels like the final scene  
And everything's falling down faster than I thought it would  
I hear your voice once more echo outside my door  
You know I'd change all this around now if only I could  
But I've got to go home, home  
Got to go home, home

It looks like I've got to go, it feels like the final scene  
And everything's falling down faster than I thought it would  
I hear your voice once more echo outside my door  
You know I'd change all this around now if only I could  
But I've got to go home, I gotta go home  
Got to go home, but I've got to go home
