

The New Torch Song

Ocean Colour Scene

All around the world people laughing now
All around the world people smiling now
With all about the girl nothing to hold on to
And all about the girl people frightened, too
All around the games we could see the sun
All around the gaze holding so much love
Hidden in your face, nothing to look into
Looking in your face, looking too deep for you

All around the world
All around the world
All around the world
All around the world
All around the world
All around the world

All the world to scream, vicious flying by
Faster than a ,, reaching to the sky
Deep within the blue between the ocean and above
Sweeter than the sun ray, sweeter than love

Sweeter than the sun ray
Sweeter than love
Sweeter than love
Sweeter than love
