Future Is

Octavia Sperati

So they told you it does not exist You have to rethink your life You don't need much guidance It's in your soul

Sing the words you have spoken to the dark Live to breath the fresh air Fight for all there is to achieve It`s in your soul Tormenting you

I`m so cold
But your love can`t warm me
I can`t breath
But your breath won`t reach me

A commitment not easily broken Master! Who are you working for?

Are you watching me?
See me burning
Although my soul is frozen

I won't forget

I`m so tired
But how to sleep
When I close my eyes
Then I see your face

Bring the force back to balance And reach for unknown limities

Are you watching me?
See me burning
Although my soul is frozen

I won`t forget
I will!

So they told you it does not exist You have to rethink your life You don't need much guidance It's in your soul
