

Hassan Chop

Shit hits the fan when Apache meets the blade
Caliphate destruction it's a war that must be waged
Heads are gonna roll when the tire treads stop
These crimes they will be paid for, said Hassan Chop

Killings so others will be saved
The real God, he favours us today
The suffering is never gonna stop
As long as the breath of Hassan Chop

Swords gleam in the desert, the snipers are in line
Corsairs in the crosshairs, they're gladly give their lives
Innocents are scattered like Bedouin in the sand
In this fight for god in a god forsaken land

We kill so others will behave
We'll lead this modern day crusade
'Deliverance' is never going away
As long as the will of the USA

Caliphate destruction is a war that must be waged
Caliphate destruction is a war that must be waged

Possession of the sword well it passes down the line
From dictator to liberator to freedom fighter fine
The game is always changing, the result is still the same
Because our God is righteous, and yours the one to blame

Killings so others will be saved
The real God, he favours us today
The suffering, will it ever stop?
As long as the breath of Hassan Chop
