

Little Tigers

Oh Wonder

We were driving to the river with the roof down
The moon was out, the moon
And the stars were singing whispers of a new found
Our love was out, alive

You lit a sparkler for the 5th of November
We drew our shapes in light like a map of forever

We were tigers
Little tigers
Running in the dead of night
Little tigers

And in seconds we descended to the slipstream
Your hand in mine, so tight
We were speeding past the ethers of what could be
The time was right
Oh the time was right, to fly

We were tigers
Little tigers
Running in the dead of night
We were tigers
Two little tigers
Running in the dead of night
Little tigers

There's something about you
It's easy to say
I could spend my all nights beside you
Forever and a day
So throw out the history
Throw it all away
We're the little tigers running
Running away
Away, away, away, away, away, away
