

Thin Green Line

Oi Polloi

So here we are - a thin green line
Into the nineties, runnig out of time
Extinction of our planet has already begun but don't let them t
ell you nothing can be done
Some of us are angry & fighting back
Non-violent direct action is a means of attack
No, we're not giving up without a fight
No nuclar plant here - we're going to trash the site
Gotta be honest, gotta be blunt
If we really want to stop them we've got sab the hunt
Smash that bulldozer, watch the flames go higher
Pull the plug & cut the wire
We get beaten up & send to jail
But I don't care if that's what it takes to save the wales
Save our Earth, save the wilderness land
Are you for us or againts us? Time to make your stand
See that whaling vessel sinking into brine
Taken out by a limpet mine
See those trees standing so tall They've been spiked so they wo
n't fall
See that excavator going up in smoke
Sugar in the petrol tank - that's no joke
Ecosabotage in the dead of night
Like mushrooms break through concrete in the moonlight
