All The Way

One Man Army

I'll leave at night while the motor's running
We'll smoke a joint just before i'm going
I'll say goodbye to all of you to everything i ever knew
I'm in love but the end is early
I never noticed it was coming
And i knew it was over when we stared at each other
I've been losing and i've been dreaming
We've been fighting and i've been drinking
I'm running tired but i'm running true
I should walk when everything's cool but
I have a hard time letting go here
Cause i know that it ain't easy
To walk away from everyone
Who ran with me all the way
But before I go I left something out of place
I hope it blows up... blows up in their face yeah
And everything will be fine
