

All I Wish

Opus

Everyday and everynight
Every little heartbeat I can feel it right
Every single breath I take, I gotta do it for one sake

Everywhere I've ever been, everything I've ever seen
I don't care for that anymore
There's only this I am lookin' for

All I wish is havin' you near me
Try to catch a little smile
The only thing that's makin' me really
Feel like in heaven for a while

Burnin' blood - a spinnin' head
All has changed with nothin' said
I never knew what I'd really need
No return now it's just a ONE WAY STREET

No more shadows - only light
Fadin' doubts get out of sight
A jumpin' heart gets out of control
With untied passion and a dancin' soul

All I wish is havin' you near me
Try to catch a little smile
The only thing that's makin' me really
Feel like in heaven for a while

All I wish is havin' you near me
Look into your deep blue eyes
That's the only way to get really
A second chance of paradise

All I wish is havin' you near me
Try to catch a little smile
The only thing that's makin' me really
Feel like in heaven for a while
