

# When the Night Comes

Opus

I touch the ground  
'cause your leavin'  
Early in the morning  
And the night fades  
away with you  
It's gettin' cold around me  
As you go with the dawning  
And the light fades away with  
you, too  
But I see in your eyes  
And deep in your heart  
Your love starts to glow  
And i can't tell you lies  
Don't want to be apart  
When the night comes  
When the night comes  
When the night comes - I just  
want someone like you  
It's like a sign on the wall  
I see your face through the  
window  
I want to know why I need you  
so  
But the wind through the land  
Has blown away the answer  
Every love's flyin' high and  
gettin' low  
But I see...  
When the night comes...  
I don't know where to go  
'Cause I seem to be left over  
Tell me why there's no peace in  
me  
All I want is to talk  
With someone who wants to  
listen  
Who wants to listen to my  
heart and to my soul  
What I've seen all along  
I know I won't find  
Someone better than you  
I don't know if it's wrong  
But I've made up my mind  
When the night comes  
When the night comes  
When the night comes - I want  
no one else but you  
When the night comes...
