

# Leaving It All Behind

Orchid

People may come and people go  
The way that they have before  
Woman you always held the line  
A hand inside the door  
Taking the joy inside my friends  
And all that they have to give  
But when it all comes to darkest times  
You'd show me just how to live

I wanna thank you for myself  
And what you've done my way  
I wanna thank you for myself  
And everything today  
Oh my way, oh today, oh my way

A child of social graces not  
A man up against the wall  
You'd give to me everything you got  
And then you'd give it all  
Finding the love inside myself  
I'd try as I make my way  
Putting my fear upon the shelf  
I'd try just to do what you say

I wanna thank you for myself  
And what you've done my way  
I wanna thank you for myself  
And everything today  
Oh my way, oh today, oh my way

Looking to find the truth inside I try to make my way  
Slipping into the darkest times you always help me find a way  
Trying to find the things inside you always said I'd be  
Circles inside of spiraled lives, a ship that's lost without a sea

And in the end of the day, we're leaving it all behind  
All we are slips away  
And in the end of the day, we're leaving it all behind  
All we are slips away  
We're leaving it all behind  
We're leaving it all behind  
We're leaving it all behind  
We're leaving it all behind  
We're leaving it all behind

People they come living their day  
But in the end we all just burn away  
Burn away, we're leaving it all behind  
Oh yeah  
We're leaving it all behind
