

We are inert resurrected  
Countless times from an archaic past  
Salvaged parts reprocessed machines  
The pick of the human ash heap

The primal spark dissipates  
Carbon cast of a carbon cast

Gears turning without teeth  
Half life growing shorter  
Decay as a threshold  
The break down of our constraints

The primal spark dissipates  
Carbon cast of a carbon cast

On a long enough timeline we are all built to break  
Cancerous abiotic enemy within  
Mithridatic vessel collected works of sentience  
Build immunity to life fully embrace its end  
Cellular composition rendered obsolete  
Radiation burns traces of longevity

A diaspora of life  
Vomited forth from the  
The noble death of stars  
Cosmic parody

The primal spark dissipates  
Carbon cast of a carbon cast

Elaborate mechanisms spreading the disease  
Unfortunate side effects of baser tendencies  
Resist the urge follow cardinal genetic marker tasks  
Sterilize this planet make this the generations last

Mithridatic vessel collected works of sentience  
Build immunity to life fully embrace its end
