Landforms

Other Lives

I am watching the ground below from above Founding all of the shapes we know.

Oceans and planes are

Oceans and planes are

Landforms are forming

The oceans and planes.

I see the old ones dying away...

Land formed all that it comes between.

See how all of it used to be one...

Oceans and planes are

Oceans and planes are

Landforms are forming

The oceans and planes.

I see the old ones dying away...
