

The Long Road

Overkill

Bring your attitude, bring your will to win
We're going down the mountain boys
May take it on the chin
Alert the multitudes, and wear your thickest skin
We're going down the mountain boys
Little pig, little pig, let me come in

It's not enough to heed the call
It's not enough for the long haul
It's not enough, so give it your all
Onward, onward-upward

We've walked the long road a thousand times before
We held out head high and kicked right down the door
We've walked the long road a thousand times before

Pack your fortitude, your honor and your fight
We're going down the mountain boys
With an undivided right
Give 'em what they came for, by dawn's early light
We're goin' down the mountain boys
By god man, we will ignite

In the sun, 'til it's done, marching on
In the sun, 'til it's done, marching on
In the sun, 'til it's done
