

# Black Sails

## Paddy and the Rats

We feared the God  
Lucifer said he is dead  
We sold our souls to him  
For the might instead  
All the night we wanted blood  
Who we were and what we have  
Had been eaten up by howlin' of dying's dread

It's alright, while we're breathing  
But all day we can't stop bleeding

We were born to fight  
We were born to win  
The devil's brigade came  
Straight from hell  
We were born to fight  
We were born to win the fray  
We got the black sails

Since the day we've signed  
Our rapacious deadly curse  
Fear and death and misery  
Vile, not the worst  
The stench of reeking death  
Drove us to insanity  
Our bodies and our souls are rottin'  
Till eternity

It's alright, while we're breathing  
But all day we can't stop bleeding

We were born to fight  
We were born to win  
The devil's brigade came  
Straight from hell  
We were born to fight  
We were born to win the fray  
We got the black sails

In the night while you're sleeping  
We will arrive  
Your dreams are freezing  
Death will kiss your mouth  
Your soul we need

In the night while you're sleeping  
We will arrive  
Your dreams are freezing  
Death will kiss your mouth  
Your soul we need  
Your soul we need

Your soul we need  
Your soul we need

It's alright, while we're breathing  
But all day we can't stop bleeding

We were born to fight  
We were born to win  
The devil's brigade came  
Straight from hell  
We were born to fight  
We were born to win the fray  
We were born to fight  
We were born to win  
The devil's brigade came  
Straight from hell  
We were born to fight  
We were born to win the fray  
We got the black sails
