

# Let Me Out

Pain

I cannot breathe suffocating slow  
I need to come up for Air  
The monster's in my head they won't leave me be  
I told them thousand times, just stay away from me  
A constant battle within, A battle I can't win  
It triggers the fear of failure  
Stereotype society you better think like others think  
Remote controll human disaster

World turns dead right before me  
I can't hide in the past, I need to break away from me  
Life burns black, no sanctuary  
I did my time so let me out

Like a broken record, it repeats itself  
Like a wheel.. and round and round it goes  
It's like we're on a path, on a path to nowhere  
Running out of time, running out of passion  
Once created times, now a storm of nails  
Razor sharp and it won't stop yet

World turns dead right before me  
I can't hide in the past, I need to break away from me  
Life burns black, no sanctuary  
I did my time so let me out

Running out of ways to run, it's a dead end street  
Been taking all the turns.. They all turn back to me

World turns dead right before me  
I can't hide in the past, I need to break away from me  
Life burns black, no sanctuary  
I did my time so let me out
