

# The Enemy Within

Paragon

Kept in a taste of fear willing to obey  
An envy to bow and pray  
Leeches all around feeding on our dreams  
And nothing's what it seems

None dare to break the chain  
Futile fight for the living  
Damned to live a life in vain  
Blood and soul your giving

Die in fire  
Die in pain  
Ashes blown in the acid rain  
Feel the blade  
Feel the steel  
You're the enemy... within

We fear the alien - a force from space  
Blind for the traitors of our space  
Under the plague all humans gonna bleed  
Born from hatred and greed

Way into mind control  
Life under surveillance  
Evil takes it's toll  
We're hypnotized - in trance

R:

Dig and build your grave  
To the beat of doom  
The masters are the slaves  
Dead you leave the womb  
On and on - marching on  
Straight into decay  
Gear wheels of evil work  
With blood and tears you pay
