

Here In Front Of Me

Passafire

Sun shines down on the mountain side
Lonely cloud that blocks the light
Shadow cast on the face of the range
In the shape of a burning flame

If there's a sign please let me know
It's got me feeling uncomfortable
Incidence is a terrible thing
When it's actually happening
I... is it actually happening
I... right here in front of me

Never seen something like this before
Buy supplies gotta look for more
There's no still frame this is life
No film left behind these eyes
Edging closer towards the place I know
Fog on the panes of the cold window
Footprints fade in the falling snow
If it's a sign just let me know

If there's a sign please let me know
It's got me feeling uncomfortable
Incidence is a terrible thing
When it's actually happening
I... is it actually happening
I... right here in front of me
