

# Kiss My Head

Passafire

And she said "only kiss my head"  
When it feels like it feels right now in bed  
Because a girl can only take so much of a good thing  
Before it starts to lose effect

The temperature is so high  
Can you feel it sweltering?  
Put you hand on my heart  
Can you feel it melt away?  
It feels so good to be  
Something you appreciate

At times, it almost feels like I'm about to levitate  
And when we're staring at each other I'm the first to blink  
It's overwhelming to the point I don't know what to think  
And now I'm looking at you finally we can embrace  
I got a mind to wrap arms around you, kiss your face

And she said "only kiss my head"  
When it feels like it feels right now in bed  
Because a girl can only take so much of a good thing  
Before it starts to lose affect

After the sun comes up  
Is when we go to sleep, yeah  
It's now a memory  
That we both get to keep, yeah  
Until the next time  
Whenever the next time will be  
I see the future and I see you standing next to me

Ohhh

And she said only kiss my head  
When it feels like it feels right now in bed  
Because a girl can only take so much of a good thing  
Before it starts to lose effect

And she said only kiss my head  
When it feels like it feels right now in bed  
Because a girl can only take so much of a good thing  
Before it starts to lose affect
