

Unfamiliar

Passafire

I want to make it into something bigger than it is, i don't mind

Just don't waste my time

I want to take it to the top and throw it over the ridge

Let it fly into the light, goodbye

In time you realize it's already been done

Sometimes you recognize some places or someone

Just don't waste my time

Well it's not who you thought it was

Unfamiliar

But you've got what you've got

It leaves me bewildered

With every turn of your gears

Years and years go by

We dare ask why

In time you realize it's already been done

Sometimes you recognize some places or someone

Just don't waste my time

I want to make it into something big but what is this

Unfamiliar

But you've got what you've got

Leaves them bewildered

And i don't care if it is

Unfamiliar

Just don't waste my time
