

## Pathogens of Cystic Decay

### Pathology

Ageless as the Anti-Christ, evolution  
life cycle of dementia  
wounds infested with unholiness  
seeping lacerations of unsanitary measures  
cleansed in sickness  
mutations of unhumanistic traits  
enter the body and consume its host  
eating it from within  
causing inflammation of the putrid soul  
festering inhabitation spawned  
functions of depravity allure  
necrotic vengeance eroding the fiber of creation  
all destined to be abolished  
by a creature of elemental composition  
cells infested with spoiled semen  
pulsing degenerate mutant like behaviour  
creature of the Anti-Christ, evolution  
enter the body and decay the innards  
flesh eating itself, reverse festation  
necrotic vengeance eroding the fiber of creation  
all destined to be abolished  
pulmonary embolism cause of the end  
tissue tears from bone
