

# The Beast Within

## Pathology

Unlock the mechanism  
Unleashing the buried primal human instinct  
The awakening of cruelty  
Ancestral memories  
The pain of evolution is relived  
Life is now cheaper than the dirt we pile the bodies on  
Humanity's disassociated with what once made us feel....Alive  
Societal disintegration, forgotten empathy  
A cancerous growth of inhumanity  
A subconscious void filled with aggression  
The beast within, memories of civility lost inside  
Animalistic barbarity only resides  
Unlock the mechanism, open the floodgates  
Unleashing the buried primal human instinct  
Life is now cheaper than the dirt we pile the bodies on  
Humanity's disassociated with what once made us feel alive
