

Dove Of Peace

Patrice

Excuse me sir, you have a license for this war
Raising sodom and gomorrah but what about tommorow
Hey Mr. President you never present no evidence
When it is fully evident that your habit needs betterment
Yes I know who you are but could you please breath in this bag
And now let me see how straight a line you walk
How come you slur your speach like your words are out of reach
See people like you just don't practise what they preach
You say the people shall not kill when you have blood on your hands
You say the people shall not steal when you just take what you can
Why can't you keep it real, Why can't you just come straight
I wonder how you sleep or if one day you will break

(Chorus:)

We've got to reach up as high as we can reach
Teach those with guns the power of speach
Remove the bullets from the breach
and feather a nest for the dove of peace

Gather the nest it's in our own interest
Tell me who wants to see that red botton being pressed
See ther's war in the east and ther's war in the west
They say god bless us they're saying god bless U.S.
Why not invest the same amount of interest
In some other places where the oil doesn't rest
All people are blessed and this life is a test
I make just one request let us clean up this mess

(Chorus:)

We've got to reach up as high as we can reach
Teach those with guns the power of speach
Remove the bullets from the breach
and feather a nest for the dove of peace

Is it the drugs that we take the doctrines in our head
I knwo we're not like that I know we're not all bad
We like to see children play see them ok
Whatever happens why take that away

(Chorus:)

We've got to reach up as high as we can reach
Teach those with guns the power of speach
Remove the bullets from the breach
and feather a nest for the dove of peace
