

# Love Songs For Robots

Patrick Watson

Breaking down,  
Your days getting longer  
There's a yellow glass dragon who's chasing you around  
Sit your head on a silver jet stream while the smoke is rising  
over your thoughts and your dreams  
Watch over you, you watch and fall down  
Your nuts and bolts are all over the ground.  
You get up, get up  
You get up, get up, you get up

Something's leaking  
It leaks from your eyes where all these tears past the problems  
Stop wasting your words from around  
as you're running out of thoughts as it burns, burning out  
Watch as the flowers, thrones and winds spills close as it whis  
pers away  
Get up, you get up, get up

I will love you  
And I will love you
