

Know Your Friends

Paul Kelly

She catches taxis, he likes walking to the station
She goes to parties, he goes with her just to please her
They go round-round and round
Out at a restaurant she's a little high and mighty
He wants to kiss her, he's full of piss and peace and beauty
They go round-round and round
Know your friends, know your friends
You gotta have one, one to lean on
She has a problem with some man who stayed and then ran
He's understanding but oh how his heart is breaking
They go round-round and round
Know your friends, know your friends
You gotta have one, one to lean on
