## **Know Your Friends**

**Paul Kelly** 

She catches taxis, he likes walking to the station She goes to parties, he goes with her just to please her They go round-round and round Out at a restaurant she's a little high and mighty He wants to kiss her, he's full of piss and peace and beauty They go round-round and round Know your friends, know your friends You gotta have one, one to lean on She has a problem with some man who stayed and then ran He's understanding but oh how his heart is breaking They go round-round and round Know your friends, know your friends You gotta have one, one to lean on
