Time to say goodbye It's time to make a move Nothing left to hide Everything to lose There is not a day I wake Not a step that I take When I don't see your ghost I think you should know It's time for both of us To put aside our past We're looking forward now Strong enough to last There's not a night asleep Not a dream that I keep If I don't see your face It's you I can't replace

You're running through my mind (baby all the time)
It's not over yet
Deep inside my soul
(this I know for sure)
It's not over yet

You're running through my mind (baby all the time)
It's not over yet
Deep inside my soul
(this I know for sure)
It's not over yet

Every single night I dream of love
Every single day I'm thinking love
With every thought of you I'm still in love
Don't say goodbye cuz it's not over yet
Every night, every day
Not over yet
Every night, every day

You're running through my mind (baby all the time)
It's not over yet
Deep inside my soul
(this I know for sure)
It's not over yet
