

# All About You

Paul Stanley

It's all about you

Well, I can't take it  
I've been workin' myself to the bone  
Just to make it  
To the moment that we're all alone

In my mind I pull your body closer  
Every second feels like a day  
In my mind I'm lying next to you  
It's just a minute away, a minute away

I don't care where it ends tonight  
That's right, it's all about you  
Givin' it up until the morning light  
That's life, it's all about you

Can you feel it?  
It's electric when our souls collide  
Girl, I need it  
You're the drug that keeps me alive

In my world I'm nothing but a number  
In your eyes I feel like a king  
Lightning strikes, get ready for the thunder  
Just a minute away, a minute away

I don't care where it ends tonight  
That's right, it's all about you  
Givin' it up until the morning light  
That's life, it's all about you

Here I am knocking at your door  
Let me come inside  
Don't quit now, baby, we got more  
Hold on, hold on

I don't care where it ends tonight  
That's right, it's all about you  
Givin' it up until the morning light  
That's life, it's all about you

I don't care where it ends tonight  
That's right, it's all about you  
Givin' it up until the morning light  
That's life, it's all about you

It's all about you  
It's all about you  
It's all about you  
It's all about you
