Can nobody love you Like I love you, yeah Can nobody need you Like I need you, yeah

While you got your head in the clouds And talking so loud Can't you see past the stages It's only when you finally arrive That you'll recognise You been going through changes

Oh changes

Can nobody kiss you
Like I miss you, yeah
Can nobody tame you
Ain't no chains to hold you

While you got your head in the clouds And talking so loud Can't you read past the pages It's only when you finally arrive That you'll recognise You been going through changes

Oh changes
Ah changes
Ah changes

While you got your head in the clouds And talking so loud Can't you see past the stages It's only when you finally arrive That you'll recognise You been going through changes

Oh changes
Ah changes
Oh changes

Blink! And you just might miss it Blink! And you just might miss it Blink! And you just might miss it Blink! And you just might miss it
